Hello designers!!

As Graphics is all about communication, your transition project is to do exactly this........ but in different and creative ways.

The 160 Project

For each of the words on the list, you need to come up with 16 different ways of communicating/representing it.

You could vary the media you use, such as pencil, photography, digital, paint, collage or think graphically and use text - be creative and original with your approach to the task.

You can present your work in either a physical or digital sketchbook. Ensure that each response is no bigger than A7 in size so that you can fit 8 outcomes to an A4 page (or 8 outcomes to a slide if working digitally).

You will be presenting your work to the rest of your group and your Graphics teacher upon starting the course in September, so please bring it with you on your first day.
